QUALITY EQUIPMENT FOR PROFESSIONALS

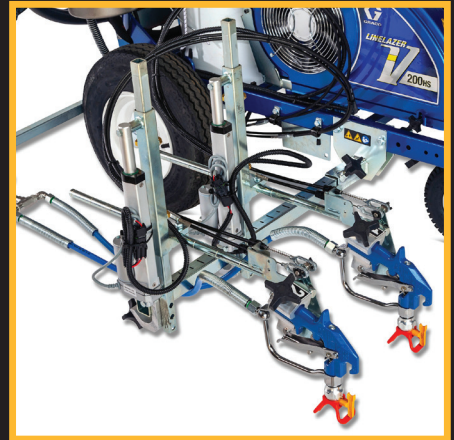

INNOVATIVE PAVEMENT MARKING & MAINTENANCE EQUIPMENT

Dispensing Technology Corporation's EasyRiser™ Spray Gun Elevator facilitates quick and easy "on the fly" adjustment of line width for line stripers. EasyRiser™ has a vertical adjustment range of 5.9" and the spray gun can be stopped anywhere within this range the operator desires. Line width adjustments are easily made by toggling a handlebar mounted switch. EasyRiser™ is shipped completely assembled with a quick connect mounting bracket and an easily mounted handlebar switch with fuse and connectors. An optional battery kit is available for stripers that are not equipped with a battery.

Designed with you and your crews in mind:

- Models for most long line and walk behind line stripers.
- 6 inches of gun travel.
- Spray guns and bead guns move simultaneously.
- Guns are individually adjustable.
- Quick release attachment bracket.
- High force heavy duty 12V DC actuators with limit switches.
- Brass on steel tension adjustments for long life and stability.
- Complete kits with switches, batteries and wiring available.
- Stand alone bare units available for OEM applications.
